There is no dislike in this game, it will make your brain work hard . love this game i hope there will be more i recommend this game to any one .. so i played for 7 hours, 7 hours of fighting honestly, the first hour the game was fine but once you make it to da vincis workshop watch out, no longer does one click zoom you in no try 5 to 10, it became sluggish and after making it to the garden forget it, wont zoom in wont do anything i tell it too, i gave up after having to click the bottom of the hourglass to zoom to the top then the controls just decided to themselves and stop working, i doubt i will get a refund but it has been requested a game you cant finish isnt work .05 never mind what i paid for this trainwreck. On par with the excellent "The Room" puzzle game series, Da Vinci is a delightful experience for those puzzlers among us who enjoy escape rooms / puzzle boxes. The art is for the most part excellent, the puzzles are seldom deeply frustrating (though a few clues are deviously hidden, especially the last couple levels!), and trial and error is minimal for this kind of puzzle genre.. Some of the rules on some of the puzzles are confusing. The end puzzle does not seem to have any set rules, but depends on a specific order of actions contrary to the mechanism in use. Other than that the general control system for movement could be improved. I found myself going in the wrong direction a lot, then taking a breath and correcting it (for "take a breath" read "swearing"). The game is gorgeous to look at, and most of the sound is appropriate. There was a lot of background noise that sounded like industrial noises or traffic. A little out of place in the 16th century.. Very challenging and nice puzzles with a luring storyline.. We've waited for the longest time for Fireproof Games to polish up the next iteration of The Room for Steam, and this game filled the void quite nicely. The playstyle and graphics are very similar to The Room where you click on stuff to make stuff happen so you can get to the next area with more stuff, all the while wondering "how did he fit all those contraptions in there?" I only had one tiny complaint, and it was due to running into a glitch where some animation didn't load, preventing me from accessing a piece of the puzzle, but that was fixed by reloading the save. All in all, if you liked The Room, or you like atmospheric puzzle games, you'll probably like this one.. We've waited for the longest time for Fireproof Games to polish up the next iteration of The Room for Steam, and this game filled the void quite nicely. The playstyle and graphics are very similar to The Room where you click on stuff to make stuff happen so you can get to the next area with more stuff, all the while wondering "how did he fit all those contraptions in there?" I only had one tiny complaint, and it was due to running into a glitch where some animation didn't load, preventing me from accessing a piece of the puzzle, but that was fixed by reloading the save. All in all, if you liked The Room, or you like atmospheric puzzle games, you'll probably like this one.. bosphorus bridge was built in 1973. you should change that historical mistake. good game btw.. A fun game. Some of the puzzles are a bit much as far as not being intuitive even after getting stuck and checking the hints. They could have less hints but make them more directive. If I'm interacting with something three different hints telling me that I need to do something with it don't really help. I dislike using hints anyway but if I'm stuck and need a little nudge forward more clear hints would be better. Instead of telling me what I'm looking at then that I need to do something with it, which if it is an open compartment with levers I already know I need to do something with it, maybe hinting about how to solve the particular puzzle in a vague way would be better. Some of the controls are glitchy. I had a hard time backing out of puzzles I was concentrating on quite a bit and had to click on areas multiple times for the game to register what I was trying to look at. This can be confusing and lead me to believe I don't need to search the particular area. Other than a few gripes I had fun playing overall. 6-6.5/10. Super glitch rich. It's as though a player shouldn't move quickly through the game, because the hints unlock functions. pretty lame.
